

Editorial

Giving continuity to its mission to convey, in print and digital form, scientific, original and unpublished articles related to the themes of Education, Management and Technology, with approaches that focus on interdisciplinary dialogues, was published the 4th issue of PERSPECTIVA EM EDUCAÇÃO, GESTÃO & TECNOLOGIA Magazine.

This project, started and developed in Fatec Itapetininga, already beginning to increase its scope, bringing not only studies done in our unit, but also in others Centro Paula Souza's units, as the articles published in this issue of teachers and students from Fatec Jahu and Fatec São Sebastião.

The range of this work also extends the areas covered by these articles, which include from the use of management and quality in different segments of society tools, demonstrating its applicability to companies in the region and its importance in improving efficiency of services provided, to the use of technologies in the cultivation of species that meet the demands of healthy food by today's consumers.

In this issue the HIGHLIGHTS shows the OFICINA DE DESENVOLVIMENTO HUMANO, an important project aimed directly to ours students that came complete their academic training, contributing with their whole development, when work the essential abilities to have conditions to show the acquired knowledge with competence and professionalism.

This issue ends the second year of Perspectiva Magazine, but the editor invite anyone who is interested to show your studies and projects in future issue, that will start next year, with the volume 3/2014.

A great reading for everyone
